Lypolesse

Line: Meso Cocktail | Presentation: Sterile professional mesotherapy vials

Lypolesse for body accelerates the process of lipolysis in areas of highest concentration of localized fat, such as the thighs, buttocks and especially in abdominal area, contains the most appropriate ingredients to perform this action such as...

KEY ACTIVE INGREDIENTS

- Lypolesse for body accelerates the process of lipolysis in areas of highest concentration of localized fat, such as the thighs, buttocks and especially in abdominal area, contains the most appropriate ingredients to perform this action such as phosphatidylcholine and deoxycholic. In addition to that is a caffeine active ingredient known for its action on the fat, and L-Carnitine as a key substance in mobilizing lipolysis process.
- CAFFEINE 3% : It acts as a potent lipolytic and lipogenesis inhibitor; minimizes the accumulation of lipids in adipocytes. It has stimulating effect on skin microcirculation.

COSMETIC / CLINICAL INDICATIONS

- LYPOLESSE for body
- PHOSPHATIDYLCHOLINE 5% : It is indicated is to dissolve and eliminate localized fat deposits.
- DEOXYCHOLATE 2.5% : Is a biological detergent reduces localized fat by promotes lysis in the membrane of fat cells in adipose tissue, thereby releasing fatty acids.
- L-CARNITINE 5% : Lipolytic, modulating lipid metabolism, stimulating lipolysis and beta lipid oxidation.
